I am a passionate and self-driven front-end web application developer and UX/UI designer with 10 years of experience. Demonstrating exceptional attention to detail and extensive knowledge of design principles, I have effectively implemented design concepts into interactive applications and websites. I deliver cutting-edge solutions that enhance user experiences and fulfill client goals. I am fully committed to advancing creativity and technological advancement to produce outstanding results. I am eager to utilize my extensive experience and interdisciplinary skill set to propel innovation, resolve intricate challenges, and contribute significantly to projects and teams in this ever-evolving industry.

Experience

Senior Application Developer

IBM India Private Limited   *08/2022 - 10/2023*

- Developed and implemented a new front-end architecture using React.js.
- Developed menus, call flows, route methods, and prompts, configured and customized them using Amazon Connect instances.
- Linked IVR incoming and outgoing call center data to the React application widget using AWS services and implemented a custom CCP.
