

VINEETH SUVARNA PRADEEP

Senior Front-End Developer & UX/UI Designer

Front-End Developer and UX/UI Designer with 10 years of experience in developing interactive web applications. Led a team of eight engineers to create scalable solutions that improved performance and usability. Proficient in managing B2B marketplace CRM systems to optimize operational efficiency.

WORK EXPERIENCE

Senior Application Developer

Aug 2022 – Oct 2023

IBM | India.

- Built scalable front-end architecture with React.js, improving performance and reusability, enabling 30% faster feature deployment
- Implemented menu customizations and call flow designs with Amazon Connect, integrating IVR datasets using AWS, reducing average handling time by 15 seconds

Tech Lead - UI Developer

May 2020 – Aug 2022

HCL | India.

- Created a reusable component library, increasing maintainability by 40% and cutting development time
- Enhanced performance by optimizing load times, resolving scalability issues, and implementing Redux, reducing code complexity by 25%

Senior Analyst - UI Developer

Mar 2018 – Jan 2020

Apptium Technology | India.

- Delivered three Angular-based web applications with third-party API integrations, enhancing usability and performance
- Managed B2B marketplace CRM systems, improving customer workflows and boosting operational efficiency

Business Associate

Jun 2017 – Dec 2017

Crown Solution | India.

- Designed test automation strategies for continuous integration, improving system reliability and addressing top outage causes
- Managed cloud servers and Docker deployment; refined DNS configurations, boosting scalability to support over 1 million users with minimal latency

Software Web Designer

Oct 2013 – Jun 2017

Ducen IT | India.

- Created UI/UX components for BI products using Webpack and Composer/NPM, improving usability by 40%
- Optimized design methodologies, delivering three MVPs ahead of schedule within one quarter, demonstrating effective milestone management

System Administrator

Nov 2007 – May 2010

Narayanaguru College | India.

- Designed visual concepts, user interfaces, and marketing materials using Adobe tools, driving higher engagement and conversion rates
- Streamlined ERP data entry for 500+ transactions weekly, automating workflows and saving 12 hours per week, ensuring accuracy in financial reporting and inventory management

SKILLS

Programming Languages:

HTML, CSS, JavaScript, TypeScript, Python

Front-End:

React.js, Next.js, Redux.js, Angular, Bootstrap, Tailwind CSS

Back-End & Databases:

Node.js, Express.js, MongoDB, SQL, Firebase

Testing Tools:

Cypress, Jest, Jasmine

Cloud & Tools:

AWS, Azure, Git, Figma, Photoshop

Methodologies:

Agile, Scrum

ACHIEVEMENTS

Innovation in BI Tool Development

- Authored comprehensive design guidelines that enabled the development of 10+ core modules, improving overall system functionality
- Automated workflows, reducing report processing times and improving operational efficiency

Optimized Code Snippet Deployment

- Improved system efficiency by implementing streamlined coding practices and identifying three key bottlenecks causing production delays
- Documented and resolved these issues, resulting in a significant boost in output quality

Excellence in Concept Visualization

- Received the Concept Visualization Award for exceptional design innovation, enhancing project deliverables and contributing to the success of three major client initiatives
- Demonstrated creativity that drove impactful results and exceeded client expectations

EDUCATION

MSc Electronics and Communication System

Nehru Arts and Science College

Jul 2010 - Aug 2012

Diploma Digital Visual Media – Animation

Image Education Institute

BSc Physics

Malankara Catholic College
